Latón

El latón es una aleación de dos metales, el cobre y el zinc, la proliferación de utensilios y ornamentos de latón a lo largo de la historia de la humanidad, obtenidos de modo artesanal y actualmente de forma industrial, es debido principalmente a sus destacadas propiedades:

- Es un material fácilmente moldeable con una temperatura de fusión inferior a la del hierro, el acero o el bronce y el cobre. El latón funde alrededor de 980°.
- Tiene un excelente comportamiento y plasticidad en la estampación en caliente.
- Es un buen conductor térmico.
- Tiene una buena resistencia a la corrosión. De ahí su utilización en grifería y racordaje para conducciones de agua.
- Posee unas excelentes propiedades de soldadura.
- Es un metal fácilmente reciclable y cuyos residuos se pueden seleccionar con facilidad y volver a fundir cuantas veces sea necesario.
- No se altera a temperaturas comprendidas entre -100° y 200°, ni se degrada con la luz.

Dentro de nuestros fabricados en latón, podemos dar a la pieza recubrimientos decorativos, tanto el cromo brillo, cromo satinado, como tratamientos de pintura en cualquier color, o acabados en imitación madera.

Pueden consultar cualquier acabado que precisen para la decoración de sus instalaciones.

Brass

Brass is an alloy of two metals, copper and zinc, the proliferation of tools and ornaments made of brass along the history of humankind, from handicraft and so now industrially, it is mainly due to their outstanding properties:

- It is an easily moldable material with a melting temperature lower than that of iron, steel or bronze and copper. Brass melts around 980 °.
- You have an excellent performance and plasticity in the hot stamping.
- It is a good heat conductor.
- It has good resistance to corrosion. Hence its use in coupling for taps and water pipes.
- It has excellent welding properties.
- It is a metal recivable easily and whose residues can be selected with ease and re-merge as necessary.
- No change at temperatures between -100 ° and 200 °, degrades or with light.

Within our products in brass, we can give the piece decorative coatings, both the bright chrome, satin chrome, paint and treatments in any color, finish or imitation wood. You can consult any finish that may need to decorate their facilities.
